Rabbi's Message

How do we explain when bad things happen to good people? When the tsunami first hit, I thought of Rabbi Harold Kushner. When he wrote *When Bad Things Happen to Good People*, he carefully titled the book "When" and not "Why." We know that bad things happen. Good people get sick, they suffer, they die, just like bad people. The "when" is clear to us. It's the "why" that is not apparent (unless, as one of my astute Religious School students pointed out, there is a clear cause and effect like smoking and lung cancer – although even then, how do you explain why some people who smoke get lung cancer and others don't?).

After the tsunami, people asked, "Why does God cause these things to happen? Why does God allow these things to happen?" You may have read the position of some religious thinkers who claim that we bring these things upon ourselves due to our inherently sinful natures, but that is not a Jewish belief. The Talmud tells us, "Nature pursues its own course." Rabbi Harold Schulweis explains what this means when he tells us to distinguish between two aspects of God, the side we call Elohim and the side we call Adonai. Elohim is the name we use for the source of nature, the God of Creation; Adonai is the name we use for that aspect of God that is involved in human affairs, the God of Morality. Both are aspects of the one God. At the same time that Elohim teaches us that nature is not within our control, Adonai teaches us that our human response to nature is within our control.

And so the Jewish response to tragedy is not to dwell on "why" but more to focus on "What can we do?" The answer is always the same: Give tzedakah and perform deeds of lovingkindness. This is the answer whether it is how to respond to tsunamis or how to react to someone who has cancer, how to respond to earthquakes or mudslides or hurricanes or how to relate to someone who is suffering. Repentance, prayer and tzedakah do not prevent bad things from happening to good people; they merely give us, as mere mortals, a way of trying to make things better. Sometimes that is all we can do; and sometimes, that is enough.

President's Message

When Moses was wandering in the desert for 40 years, at least he didn't have to worry about a snow shovel.

My trip to San Diego last month was absolutely wonderful. I got to meet my Aunt Gloria, whom I had known about four years, and her significant other, Artie, as well as my first cousin Mary. I also learned that my other first cousin's name is Anne and that she lives in Hawaii with her husband John. I find it very satisfying to begin to tie up some loose ends in my family. I hope that over the years that we are able to mend a family rift and be able to share family moments with each other. I have learned that when people are wronged, that they can be hurt, but still move on with their lives. Very little was spoken of the past, and much was spoken of the present and the future, because that is what is left for our family. Dwelling on wrongs of the past do little to make the future any nicer. I was also able to spend some time with just my Mom and Dad, which is something I don't get to do often, as when we are together it is usually with our children and other friends and family. This is a trip I will remember for the rest of my life.

Shalom,
Howie Hirsch
